

Paiflow

● STELLAR TESTNET

Quick Test

Thanks for helping test Paiflow. Four short tasks and a survey — no coding, no crypto wallet, and nothing to record.

BETA.PAIFLOW.XYZ · ALPHA ROUND · GROUP B

Before you begin

This takes **about 20 minutes**. You don't need to know how to code, you don't need a crypto wallet, and you don't record anything.

What you do: four short tasks, answering a survey as you go. A completed survey makes you eligible for the **₱125** incentive. An [optional bonus](#) at the end adds **₱75**.

What you need: a laptop or desktop with **Chrome** or **Brave**, your phone, and the username and password we sent you.

OPEN THE SURVEY NOW

Open it in its own tab and keep it open: forms.gle/s5D1R8xVnN6X4N338. Each task tells you when to switch to it. Don't close that tab until you've pressed Submit — an unfinished survey isn't saved.

WE ARE TESTING PAIFLOW, NOT YOU

Most of this guide deliberately doesn't tell you where to click. If something is confusing, that is exactly what we need to hear — write it down and move on. There are no wrong answers.

TESTNET ONLY

Everything here runs on Stellar testnet. Testnet money is free and worthless. You will never be asked for real funds, a card, or a seed phrase. If anything ever asks you for one, stop and tell us.

WHAT WE RECORD

If any of it concerns you, contact us before you start.

- **Usage analytics, sent to PostHog:** which buttons and screens you reach, and where errors appear. Events are tied to your test account's internal ID, not your name.
- **Your screen is not recorded**, and neither are your face or voice.
- **Your survey answers** are stored in Google Forms and read by the Paiflow team.
- **Only if you do the optional bonus:** the public address of the wallet you connect, the transaction hash, and your IP address at the moment you connect are recorded and linked to your test account. We never see or store a secret key.

20 minutes, four tasks

B1 First impression · 2 minutes

- 1 On your laptop, open beta.paiflow.xyz.
- 2 Look at the page for **ten seconds. Don't scroll, don't click.**
- 3 Switch to the survey and answer **section B1** now, before you look at anything else.

Sign in · 1 minute

- 1 Back on the page, click `Build a flow`.
- 2 Enter your **Username** and **Password**, then click `SIGN IN`.

☐ You land on your dashboard ("Your flows.").

B2 Read a flow · 3 minutes

- 1 Click `NEW FLOW`, name it **Shop**, and click `CREATE FLOW`. The builder opens with an example flow already on the canvas.
- 2 **Don't change anything yet.** Look at the screen and work out: when money arrives, who gets paid, and how much each?
- 3 Answer survey **section B2**.

B3 Make it yours · 8 minutes

Here is the situation. There are no steps — do it however makes sense to you.

THE SITUATION You run a small shop with a business partner. Customers pay you in **XLM**. Whenever a payment arrives, **60% should go to you and 40% to your partner**. Nobody else gets a share.

Change the **Shop** flow so it does exactly that. Use these two addresses:

You	GAS4J4X5VR7TYWGD5CLVIFMIHDA0AJZYA0A7KPVHKYS5XWSTMUZBC25K
Your partner	GBPL3PML0WFYARP60L2H6HIFMLS5Q7ZWUMNKTI0PBK4REPXLZ0MY2XSP

You're done when the `DEPLOY` button at the top is no longer greyed out. Then:

- 1 Click **DEPLOY**. A review page opens.
- 2 Read the review page. **Stop there — do not press DEPLOY TO TEST NET.**
- 3 Answer survey **section B3**.

Give yourself eight minutes. If you aren't there by then, stop anyway and tell us where you got stuck — that is a useful result, and it doesn't affect your incentive.

STUCK FOR MORE THAN THREE MINUTES? READ THIS HINT — THE SURVEY ASKS WHETHER YOU DID

- Click a block on the canvas to open its settings on the right.
- Both blocks have an **Asset** setting. The example uses USDC; the shop is paid in XLM.
- The **Split** block lists its recipients. Each one has an address, a share and a label, and the shares must add up to 100%.
- The **Errors** button at the top lists whatever is still wrong.

B4 The customer's side, on your phone • 3 minutes

A flow like yours gives you a page to send to the people who pay you. Here is one we made earlier.
Scan each code with your phone's camera — or tap the link if you're reading this on your phone.

1 • The pay page

[Open the pay page](#)

Look at it as if a shop had just sent it to you. **Don't pay anything** and don't install anything.

2 • The live page

[Open the live page](#)

Scroll down to **Live events**. Ignore the red “Authentication required” box and the missing QR image — both are already on our list.

Then answer survey **section B4**.

Finish the survey • 5 minutes

Answer the last section, **About you and overall**, and press **Submit**.

₱125 once we've received your completed survey

An honest “I couldn't finish B3” counts exactly the same as a perfect run. We'll contact you on the name you enter in the survey. Please leave everything else in the app alone: other block types, **Ask AI**, **Dev mode**, and the Profile page aren't part of this round.

Thank you. Twenty minutes of somebody's real attention is the most useful thing we get.

+P75 Optional bonus

About 25 more minutes. You install a test wallet, put your Shop flow on the Stellar test network, and send it one payment. Do this **after** submitting the survey — you'll send us one link at the end.

1 Install Freightier and get free testnet XLM

- 1 Install the [Freighter wallet extension](#) in Chrome or Brave and pin it to your toolbar.
- 2 Open Freightier → **Create new wallet**. Write down the recovery phrase somewhere safe.
- 3 In Freightier, open the network menu at the top and choose **Testnet**.
- 4 Copy your address (it starts with `G`) and open this link in a new tab, replacing `YOUR_ADDRESS`: `https://friendbot.stellar.org/?addr=YOUR_ADDRESS`

☐ Freightier shows **Testnet** at the top, and a balance of 10,000 XLM.

2 Deploy the Shop flow

- 1 Open your **Shop** flow and click `DEPLOY`, then `DEPLOY TO TESTNET` on the review page.
- 2 Freightier pops up — check it says testnet, then **sign**.

- ☐ A “Contract deployed” message appears and you're taken to the deployment page.
- ☐ Within about a minute the status becomes **ACTIVE** and a QR code appears.

3 Pay it once

- 1 On the deployment page, click `OPEN TRIGGER PAGE`.
- 2 Enter **10** as the amount, click `CONFIRM AMOUNT`, then `CONNECT WALLET & TRIGGER`, and sign in Freightier.
- 3 Go back to the deployment page and watch the live feed.

☐ The live feed shows one RECEIVE row and two PAYOUT rows: 6 XLM and 4 XLM.

4 Send us the link

Copy the address of your **deployment page** from the browser's address bar and send it to us by replying to the message this guide came in. That link is what makes you eligible for the extra **P75**.

Already on our list, so no need to report: the trigger page can report a failure even though the payment went through (check the live feed first); the review page lists several wallets, but only Freightier works for deploying right now; and the live feed can lag a few seconds to a minute behind the chain.
