JRU Event Primer

Updated Oct 7, 2026

The Paiflow event at JRU combines a morning talk with two parallel tracks: a mini hackathon and a workshop and seminar. Hackathon teams build an app that solves a real problem with automated payments through Paiflow.
Dev mode will stay disabled for the duration of the hackathon.

01 At a glance

Item	Details
When and where	October 14, 2026 · José Rizal University · 8:30 AM–5:30 PM PHT
Tracks	Mini hackathon: H412 · Workshop/seminar: H407
Teams	10 teams of 1–4 people
Online onboarding	October 12, 2026 · 9:00 PM PHT
Prize pool	PHP 10,000 across five awards
Network	Stellar testnet

02 Event program

Online onboarding

> **For hackathon participants only.** October 12, 2026, at **9:00 PM PHT**. Hear the rules and watch a live Paiflow demo: build, deploy, scan the QR and see the payout. The meeting link will be provided through **blockhub.academy** or the student organisation representatives.

Shared morning program

Time	Activity
8:30–9:00 AM	Registration
9:00–9:30 AM	Opening
9:30–10:30 AM	Morning talk

After the talk, hackathon participants proceed to **H412**. Participants who are not joining the hackathon move to **H407** for the workshop and seminar.

02 Mini hackathon

Venue: Room H412, JRU.

Time	Activity	What happens
10:30 AM–12:30 PM	**Integration**	Deploy your flow and aim for your first confirmed payout
12:30–1:30 PM	**Break**	Optional coding; check your deployment and payout evidence
1:30–3:30 PM	**Build and integration**	Complete integration and prepare your demo
3:00–3:30 PM	**Submission**	During the final 30 minutes of integration, submit before 3:30 PM with your deployment ID and payout transaction
3:30–4:30 PM	**Pitching**	10 teams × 5 minutes; random order drawn at 3:30 PM
4:30–5:00 PM	**Deliberations**	Judges deliberate
5:00–5:30 PM	**Closing and awards**	Announce prize winners and deliver closing remarks

Workshop and seminar

Venue: Room H407, JRU.

Participants who are not joining the hackathon move to the workshop and seminar after the morning talk. This track focuses on blockchain.

03 Preparation and integration timeline

Starting now: choose a problem, talk to potential users and sketch your app.

After online onboarding: use the demo and instructions from the session to prepare your app for event-day integration. Start building your app's screens and features that don't involve payments. You may use the supplied starter, but keep its payment features and live feed disabled until October 14.

October 14, 10:30 AM PHT: receive your team's Paiflow account credentials and begin Paiflow integration. Flow deployment, connecting your app to Paiflow APIs and live payment testing must wait until October 14. Preparing a wallet, adding its trustline and obtaining testnet funds are allowed beforehand.

Integration window: Paiflow integration starts at **10:30 AM PHT on October 14**. Follow the mini hackathon schedule above.

04 The challenge

The theme is open. Start with a problem you or people around you have, then choose the Paiflow blocks that fit. These examples show how blocks combine and can inspire your own idea.

Paiflow deploys a flow you draw as Stellar contracts. Your app decides *who* pays and *why*; your flow decides *when* money moves and *where* it goes.

Idea	What it does	Paiflow pieces
Barkada bill splitter	A friend pays their share of a trip. The money automatically goes to friends who paid the group's expenses	`on_receive` + `split`, QR trigger page
Org dues and event tickets	QR payments for dues or tickets split between the org treasury and venue	`on_receive` + `split`, embed + live feed
Creator collab tip jar	Shared-project tips split between collaborators at agreed percentages	`on_receive` + `split`
Sari-sari store checkout	A customer scans and pays; the supplier's share is sent immediately	`on_receive` + `split` or `pay`
Digital baon	A parent sets up scheduled weekly allowance payments	`on_schedule` + `pay`
Tutor or club subscription	One configured member approves an allowance for recurring charges	`subscription` + allowance page
Freelance deadline escrow	Client pays up front; acceptance before the deadline pays the freelancer, otherwise the client is refunded	`on_receive` + `condition` (`time_before`) + two `pay` branches
Rewards from a Web2 app	A pre-funded pool pays a configured recipient when the app reports a completed goal	`web2_webhook` + authenticated callback + `pay` or `split`
Transparent donation drive	Donations split among beneficiaries, with a public feed showing payouts	`on_receive` + `split`, embed + live feed

Strong projects have a real user, a flow that fits their problem, and a demo with visible payouts.

For setup instructions and example payment flows, see the AI context pack. Confirm feature availability with support before choosing an idea.

> **Support contact:** paiflow+jru.hack@artisam.xyz.

Testnet funds have no real-money value. Never store wallet secret keys in your app.

Set up Paiflow once for the business, group or branch your app serves. For example, Campus Snacks represents one branch of a snack shop. Each customer pays separately, but every payment uses the same setup: 90% goes to the shop and 10% to the student organisation. You don't need a new setup for each customer.

If your idea requires a separate payment setup for every customer, explain that as a future feature in your pitch.

05 Prizes

PHP 10,000 across five awards, for qualifying teams only.

Award	Prize (PHP)	How it's decided
1st place	**4,000**	Highest score
2nd place	**2,500**	Second-highest score
3rd place	**1,500**	Third-highest score
Best Integration	**1,000**	Highest Integration score among eligible teams
Best Real-World Usefulness	**1,000**	Highest Real-world usefulness score among eligible teams
