FEU Tech Event Primer

Updated Oct 9, 2026

Planning draft for the FEU Tech student organisation. This primer provides an overview for discussion and coordination. It is not the final public document for participants. Detailed participant instructions, including what to bring and prepare, will be provided in a separate participant brief.
The Paiflow event at FEU Tech is a full-day hackathon from 8:00 AM to 5:00 PM PHT. Teams build an app that solves a real problem with automated payments through Paiflow.

01 At a glance

Item	Details
When and where	October 28, 2026 · FEU Tech · 8:00 AM–5:00 PM PHT
Format	Full-day, in-person hackathon
Teams	10 teams of 1–4 people
Online onboarding	Date and time TBD
Prize pool	PHP 10,000 across five awards
Network	Stellar testnet

02 Event program

Online onboarding

> **Date and time TBD.** Hear the rules and watch a live Paiflow demo: build, deploy, scan the QR and see the payout. The meeting link will be shared by the organisers.

After online onboarding, participants may start scaffolding their app: set up the project, build screens and develop features that do not involve payments. **Integration of the hackathon app with Paiflow begins on October 28 at 9:00 AM PHT**, using the team's event-day account and deployment.

Participants may freely explore the sandbox at beta.paiflow.xyz before the event, including creating practice flows and testing payments with the features available there. A video tutorial is also available there. Sandbox deployments do not provide API access for connecting your own app.

You may reuse a flow design practised in the sandbox. During the hackathon's integration window, deploy it from your team's event-day account and produce a confirmed on-chain payout from that deployment. Practice deployments and payouts do not count toward qualification. Keep your hackathon app's payment features and live feed disabled until the integration window opens.

All event-day times below are in Philippine Time (PHT).

02 Hackathon schedule

Venue: FEU Tech. Room TBD.

Time	Activity	What happens
8:00–8:30 AM	**Registration**	Check in and get your team ready
8:30–9:00 AM	**Opening and briefing**	Review the challenge, rules, schedule and submission requirements
9:00 AM–12:00 PM	**Build and integration**	Receive team credentials, deploy your flow and aim for your first confirmed payout
12:00–1:00 PM	**Lunch break**	Optional coding; check your deployment and payout evidence
1:00–3:00 PM	**Build and integration**	Complete integration and prepare your demo
2:30–3:00 PM	**Submission**	During the final 30 minutes of integration, submit by 3:00 PM with your deployment ID and payout transaction
3:00–4:00 PM	**Pitching**	10 teams × 5 minutes; random order drawn at 3:00 PM
4:00–4:30 PM	**Deliberations**	Judges deliberate
4:30–5:00 PM	**Closing and awards**	Announce prize winners and deliver closing remarks

03 Preparation and integration timeline

Starting now: choose a problem, talk to potential users and sketch your app.

After online onboarding: use the demo and instructions from the session to prepare your app for event-day integration. Start building your app's screens and features that don't involve payments. You may use the supplied starter, but keep its payment features and live feed disabled until the event-day integration window opens.

Event day, 9:00 AM PHT: receive your team's Paiflow account credentials, deploy your hackathon flow and begin app integration. Your qualifying team deployment, app connection to Paiflow APIs and qualifying payout must be completed during the integration window. Sandbox practice, wallet preparation and testnet funding are allowed beforehand.

Integration window: 9:00 AM–3:00 PM PHT on event day, with a lunch break from 12:00–1:00 PM. Submit by **3:00 PM PHT**.

04 The challenge

The theme is open. Start with a problem you or people around you have, then choose the Paiflow blocks that fit. These examples show how blocks combine and can inspire your own idea.

Paiflow deploys a flow you draw as Stellar contracts. Your app decides *who* pays and *why*; your flow decides *when* money moves and *where* it goes.

Idea	What it does	Paiflow pieces
Barkada bill splitter	A friend pays their share of a trip. The money automatically goes to friends who paid the group's expenses	`on_receive` + `split`, QR trigger page
Org dues and event tickets	QR payments for dues or tickets split between the org treasury and venue	`on_receive` + `split`, embed + live feed
Creator collab tip jar	Shared-project tips split between collaborators at agreed percentages	`on_receive` + `split`
Sari-sari store checkout	A customer scans and pays; the supplier's share is sent immediately	`on_receive` + `split` or `pay`
Digital baon	A parent sets up scheduled weekly allowance payments	`on_schedule` + `pay`
Tutor or club subscription	One configured member approves an allowance for recurring charges	`subscription` + allowance page
Freelance deadline escrow	Client pays up front; acceptance before the deadline pays the freelancer, otherwise the client is refunded	`on_receive` + `condition` (`time_before`) + two `pay` branches
Rewards from a Web2 app	A pre-funded pool pays a configured recipient when the app reports a completed goal	`web2_webhook` + authenticated callback + `pay` or `split`
Transparent donation drive	Donations split among beneficiaries, with a public feed showing payouts	`on_receive` + `split`, embed + live feed

Strong projects have a real user, a flow that fits their problem, and a demo with visible payouts.

For technical setup and example payment flows, see the Paiflow developer context guide. Follow this event primer and the organisers' instructions for preparation and integration timing. Confirm feature availability with the event support team before choosing an idea.

> **Support contact:** TBD.

Testnet funds have no real-money value. Never store wallet secret keys in your app.

Set up Paiflow once for the business, group or branch your app serves. For example, Campus Snacks represents one branch of a snack shop. Each customer pays separately, but every payment uses the same setup: 90% goes to the shop and 10% to the student organisation. You don't need a new setup for each customer.

If your idea requires a separate payment setup for every customer, explain that as a future feature in your pitch.

05 Prizes

Qualification: your team must have a confirmed Paiflow deployment and at least one verifiable on-chain payout from it during the hackathon's integration window. Practice deployments and payouts do not count.

Scoring: Creativity 30%, Integration 40%, Real-world usefulness 30%.

Pitch: each team gets five minutes: three minutes for the pitch and demo, followed by two minutes of judges' Q&A.

PHP 10,000 across five awards, for qualifying teams only.

Award	Prize (PHP)	How it's decided
1st place	**4,000**	Highest score
2nd place	**2,500**	Second-highest score
3rd place	**1,500**	Third-highest score
Best Integration	**1,000**	Highest Integration score among eligible teams
Best Real-World Usefulness	**1,000**	Highest Real-world usefulness score among eligible teams

06 Event support and coordination

Lunch and responsibilities

Paiflow will provide free lunch for up to **40 participants and 10 organisers**, along with the prize pool, developer support and hackathon mechanics.

The FEU Tech student organisation will handle event logistics, including the venue, screen projection and a sound system if needed.

Planning together

The student organisation is welcome to discuss and suggest changes to any part of the event, including the program, format and mechanics.

If additional expenses are needed, please submit a **budget proposal document as soon as possible**, before committing to those expenses. Include the purpose of each expense, estimated cost and total amount requested. This gives Paiflow time to review the proposal early and approve it or request revisions as needed.
